

Virginia Graeme Baker Pool & Spa Safety Act

VGB

ALL public pools/spas should take the following actions to become compliant :

- 1) Replace ALL submerged suction outlet covers regardless of size, shape or quantity with certified covers.*

**Certified covers can be identified with "ANSI/ASME A112.19.8-2007" or "VGB 2008" inscriptions with specific application instructions.*

- 2) Have a licensed professional issue a certification of compliance based on the construction of all sumps and flow rates of each system.

OLC'S COMPREHENSIVE CONSULTING SERVICES

Have our Aquatic Professionals help you become VGB compliant, including:

- Complete on-site inspection of covers, sumps, flow rates and velocities by a professional aquatic consultant.
- Official inspection report.
- Documentation of compliance by a registered design professional.**
- Construction documents of approved suction outlet designs and other recommendations to become compliant, if necessary.
- Fast, efficient service to help reduce any closure time.

** The definition of a "registered design professional" may vary from state to state

OLC offers professional aquatic consulting to ensure full compliance with the Virginia Graeme Baker Pool & Spa Safety Act.

All OLC aquatic designers and staff are up-to-date on local, state, national and international standards and guidelines in the field of aquatics. OLC staff is also forefront of industry trends as well as health and safety issues which are of paramount importance to all users.

For each client and for every project, OLC recognizes the risks and rewards that are inherent with this specialty of architecture. User and operator safety, facility success and enjoyment by all act as our guiding principles and influence our design.
